Phillips Aerospace has been designing and building flight hardware for over 10 years. Utilizing current design tools and requirements Phillips can design, build, and test to D0160 and MIL-STD-461.

Flight Design Services

Capabilities

- Custom ATR System Design
- VME, VSX, VPX, cPCI
- 3U and 6U Designs
- Custom Compact, Lightweight Solutions
- Rugged Data Storage
- Analog, Digital, MS1553, Ethernet, Video
- Telemetry and Time Code Sync
- Wireless Networking
- Power Control and Distribution

Competitive Attributes

- Dedicated project manager for each project
- On-site engineers
- Production run capabilities
- Versatile/flexible company operations
- Ensures on time delivery!
- AS9100B/ISO9001:2000 Certified QA System

Sample Programs Engaged

- Airborne Laser
- Airborne Tactical Laser
- Guardrail
- B1B
- UAV

Tools and Compliance

- Prototype and Production Runs
- Thermal Screening
- Solidworks FlowSim Analysis Tools
- MIL810, MIL461, MIL704, DO160
- AS9100-B Certified QA System

Boeing - Silver Supplier
Northrop Grumman - Silver Supplier
Raytheon - Silver Supplier
